Ministry of Transport, Traffic,
and Technical Services

PRESS RELEASE

No. 177/2016

Date: 14th April 2016

Launch of Gibraltar Bus Tracker WebApp and New Gibraltar Bus Company Website

The Ministry for Transport, Traffic and Technical Services is pleased to announce the launch of a new Gibraltar Bus Company Website which will be featuring the anticipated Bus Tracker WebApp.

The Bus Tracking WebApp developed by HMGoG's Information Technology & Logistics Department will provide a real-time bus tracking service that will cover working routes offered by the Gibraltar Bus Company. The launch will, in the first instance, feature Routes 2 and 3 with further routes being developed soon.

The Gibraltar Bus Tracker WebApp will offer riders *real-time* bus information. From any smart phone or desktop computer with internet access, citizens will be able to access the website, select a bus route and see a user friendly transit map that will display where buses are located within the given route. The buses will move across the map in real-time.

We know where our buses are and so should you! The Gibraltar Bus Tracker Web App is yet another way in which we are trying to improve our service. Why wait for the bus when you can meet it?

The Ministry is also pleased to announce, in keeping with recommendations from the Draft Sustainable Traffic, Transport and Parking Plan, that Routes 4 and 9 are being modified for an enhanced and more efficient service. Furthermore, in light of these modifications a new pilot Route 6 will be commencing Monday 18th April. The Route starts at Market Place Terminus, proceeding down Waterport Road to Mid-Harbour Estate via St Bernard's Hospital, turning at the roundabout and back along the same route.

The new pilot Route 6 and modifications to existing Routes 4 and 9 are available to the public on the new Gibraltar Bus Company Website and at each bus stop.

The Minister for Transport, Traffic and Technical Services the Hon Paul Balban said:

“I am very happy to see the launch of the Gibraltar Bus Tracker WebApp and the updated website platform. I would like to thank the Gibraltar Bus Company and the IT & LD for their continuing hard work which will improve the public transport experience of bus users by facilitating real time information.”
